

TOWN OF GOSHEN
PLANNING BOARD
September 21, 2013
Anderson and Davis Annual visit

Board Members: Doug O'Clair, Alicea Bursey and Ed Peckham met with Shaun Carroll, Jr. at the Anderson site for our annual site visit on Saturday afternoon, September 21, 2013

Mr. Carroll showed the Board the progress that is being made in the excavation process and stated that the excavation is ahead of schedule and intern will start the reclamation process ooner.

Mr. Carroll asked the Board to look at the esker at the Anderson pit to determine if the Board felt it would visually impact the community. The Board member determined it would have little to no impact on the community and is part of the process of excavation. Mr. Carroll stated he will be moving into the esker at the front of the pit by late fall or early spring and will do his best to excavate the top portion quickly to get it down below the line of sight.

The Board members felt Carroll Concrete is doing a very professional job at the Anderson pit.

The Board then moved over to the Davis pit where Mr. Carroll showed the progress of thte Davis pit as well.

Mr. Carroll explained to the Board where recent reclamation has taken place and what is to be expected in t he future. He also explained that he will have a crew doing the reclamation starting November 1, 2013. Although no time table is set in stone, he indicated that the Davis pit will be reclaimed in a couple of years.
